CHEMICALS OF EMERGING CONCERN

Report prepared for Lake Waccabuc, NY

April, 2020

This material is based upon work supported by the National Science Foundation under Grant No. 1743988.

Background:

Chemicals of emerging concerns (CECs) are organic contaminants of anthropogenic (human) origin present in the environment. CECs can be traced to commonly used pharmaceuticals, pesticides, household chemicals, and personal care products. Most CECs enter waterbodies via point or non-point sources such as wastewater treatment plant discharges or surface runoff. Although the impact of CECs on humans is currently considered minimal, these trace contaminants may have adverse long-term effects on aquatic organisms, which in turn affects the aquatic ecosystem health and water quality.

CECs present a challenge to lake monitoring and management programs mainly because available data on their occurrence, fate, transport, and ecosystem effects is relatively limited. Further complicating this issue, some CECs, once released into the lakes, may be transformed by natural sunlight or microorganisms into the so-called transformation products that are even less studied. This research was initiated to provide the first survey of CEC occurrence in lakes in New York State. The results of this study will be used by researchers and other stakeholders to evaluate the nature and spatial distribution of these contaminants in NY's surface waters.

CECs are increasingly detected in surface waters worldwide due to advances in modern analytical techniques. Most CECs detected in this study only occurred at concentrations on the order of nanograms per liter (unit: ng/L) or "parts per trillion", although some concentrations observed were an order of magnitude higher (micrograms per liter or "parts per billion"). A total of 111 lakes participated in this research program during 2018 - 2019. The following is a brief summary of the frequency of detection and range in concentrations of each CEC observed in all participating lakes along with the results specific to your lake.

Salient Findings:

- CECs detected in lake water samples mainly belonged to three major groups: pharmaceuticals (abbreviated as "PHAR" in figures and tables), pesticides (abbreviated as "PEST") and personal care and household chemicals (abbreviated as "PCHC"). Some transformation products (abbreviated as "TP") of these CECs were also detected.
- The types and levels of CECs found in participating lakes were similar to those reported for other surface water bodies with recreational usage and potential septic input.
- The occurrence patterns of CECs were similar across different NYS regions but exhibited high inter-lake variability. For example, CEC concentrations varied from lake to lake and often varied from sampling date to sampling date for lakes sampled more than once.
- Every lake had at least one CEC detected in each sample, but not every CEC was found in every lake (this lake specific report lists the CECs found in your lake; Table 2 also lists all CECs found during this study).

Figure 1: Location of lakes participating in 2018 – 2019 CEC survey.

Figure 2: Distribution of CECs in NY lakes according to type and regional location.

Of the 300+ CECs screened for by Syracuse University, 7 were detected in the 2 samples from Lake Waccabuc collected in 2019. Sucralose, DEET, Galaxolidone, Atrazine, and Metolachlor OA were detected in both samples. Sucralose (an artificial sweetener), one of the two indicator compounds of sewage impacts, was detected in the samples, suggesting *possible* sewage impacts. Table 1 summarizes the concentrations of CECs measured in each sample.

Table 1: Summary of CECs detected in Lake Waccabuc (2019). Sample analysis was conducted in duplicate on the 2 water samples for all CECs. The limit of quantification (LOQ) is defined as the lowest concentration of a CEC in a sample that can be confidently quantified with acceptable precision and accuracy. Concentrations of CECs are all in "ng/L". Concentrations of CECs below the LOQs are italicized and reported as estimated values with "<LOQ".

				Average	
Contaminant	Category	LOQ	Date	Concentration	
Benzophenone-3 (Oxybenzone)	Personal/Household product	20	08/18/19	32	
N,N-Diethyl-3-methylbenzamide (DEET)	Personal/Household product	0.2	06/08/19	4.5	
N,N-Diethyl-3-methylbenzamide (DEET)	Personal/Household product	0.2	08/18/19	66.5	
Sucralose	Personal/Household product	45	06/08/19	116	
Sucralose	Personal/Household product	45	08/18/19	143	
Galaxolidone	Personal/Household transformation product	13	06/08/19	19.5	
Galaxolidone	Personal/Household transformation product	13	08/18/19	45	
Atrazine	Pesticide	13	06/08/19	20.5	
Atrazine	Pesticide	13	08/18/19	2.5 (<loq)< td=""></loq)<>	
Dimethachlor	Pesticide	10	08/18/19	9.5 (<loq)< td=""></loq)<>	
Metolachlor Oxanilic Acid (Metolachlor OA)	Pesticide transformation product	24	06/08/19	17.5 (<loq)< td=""></loq)<>	
Metolachlor Oxanilic Acid (Metolachlor OA)	Pesticide transformation product	24	08/18/19	22 (<loq)< td=""></loq)<>

Lidocaine PHAR topical anesthetic and antiarrhythmic (treat irregular heartbeats) Losartan PHAR used to treat high blood pressure (hypertension) and to help protect the kidneys from damage due to diabetes Meclofenamic Acid PHAR used for joint, muscular pain, arthritis and dysmenorrhea Metaxalone PHAR muscle relaxant; relieve pain caused by injuries Metformin PHAR controls high blood sugar; diabetes medication Methocarbamol PHAR a muscle relaxant Metoprolol PHAR a beta-blocker used to treat angina (chest pain) and hypertension (high blood pressure) Minoxidil PHAR help hair growth in the treatment of male pattern baldness Norepinephrine PHAR used to treat low blood pressure and heart failure Protriptyline PHAR nerve pain medication and antidepressant Pyridoxine PHAR also known as vitamin B ₆ commonly in food and used as dietary supplement	Lamotrigine	PHAR	treat seizures and bipolar disorder
Losartan PHAR used to treat high blood pressure (hypertension) and to help protect the kidneys from damage due to diabetes Meclofenamic Acid PHAR used for joint, muscular pain, arthritis and dysmenorrhea Metaxalone PHAR muscle relaxant; relieve pain caused by injuries Metformin PHAR controls high blood sugar; diabetes medication Methocarbamol PHAR a muscle relaxant Metoprolol PHAR a beta-blocker used to treat angina (chest pain) and hypertension (high blood pressure) Minoxidil PHAR help hair growth in the treatment of male pattern baldness Norepinephrine PHAR used to treat low blood pressure and heart failure Protriptyline PHAR also known as vitamin B ₆ commonly in food and used as dietary supplement	Levetiracetam	PHAR	medication used to treat epilepsy
Meclofenamic Acid Metaxalone PHAR muscle relaxant; relieve pain caused by injuries Metformin Methocarbamol PHAR muscle relaxant a muscle relaxant Metoprolol PHAR A beta-blocker used to treat angina (chest pain) and hypertension (high blood pressure) Minoxidil PHAR PHAR help hair growth in the treatment of male pattern baldness Norepinephrine PHAR protriptyline PHAR nerve pain medication and antidepressant PHAR also known as vitamin B ₆ commonly in food and used as dietary supplement	Lidocaine	PHAR	topical anesthetic and antiarrhythmic (treat irregular heartbeats)
Metaxalone PHAR muscle relaxant; relieve pain caused by injuries Metformin PHAR controls high blood sugar; diabetes medication Methocarbamol PHAR a muscle relaxant Metoprolol PHAR a beta-blocker used to treat angina (chest pain) and hypertension (high blood pressure) Minoxidil PHAR help hair growth in the treatment of male pattern baldness Norepinephrine PHAR used to treat low blood pressure and heart failure Protriptyline PHAR nerve pain medication and antidepressant Pyridoxine PHAR also known as vitamin B ₆ commonly in food and used as dietary supplement	Losartan	PHAR	used to treat high blood pressure (hypertension) and to help protect the kidneys from damage due to diabetes
MetforminPHARcontrols high blood sugar; diabetes medicationMethocarbamolPHARa muscle relaxantMetoprololPHARa beta-blocker used to treat angina (chest pain) and hypertension (high blood pressure)MinoxidilPHARhelp hair growth in the treatment of male pattern baldnessNorepinephrinePHARused to treat low blood pressure and heart failureProtriptylinePHARnerve pain medication and antidepressantPyridoxinePHARalso known as vitamin B₅ commonly in food and used as dietary supplement	Meclofenamic Acid	PHAR	used for joint, muscular pain, arthritis and dysmenorrhea
Methocarbamol PHAR a muscle relaxant Metoprolol PHAR a beta-blocker used to treat angina (chest pain) and hypertension (high blood pressure) Minoxidil PHAR help hair growth in the treatment of male pattern baldness Norepinephrine PHAR used to treat low blood pressure and heart failure Protriptyline PHAR nerve pain medication and antidepressant Pyridoxine PHAR also known as vitamin B ₆ commonly in food and used as dietary supplement	Metaxalone	PHAR	muscle relaxant; relieve pain caused by injuries
Metoprolol PHAR a beta-blocker used to treat angina (chest pain) and hypertension (high blood pressure) Minoxidil PHAR help hair growth in the treatment of male pattern baldness Norepinephrine PHAR used to treat low blood pressure and heart failure Protriptyline PHAR nerve pain medication and antidepressant Pyridoxine PHAR also known as vitamin B ₆ commonly in food and used as dietary supplement	Metformin	PHAR	controls high blood sugar; diabetes medication
Minoxidil PHAR help hair growth in the treatment of male pattern baldness Norepinephrine PHAR used to treat low blood pressure and heart failure Protriptyline PHAR nerve pain medication and antidepressant Pyridoxine PHAR also known as vitamin B ₆ commonly in food and used as dietary supplement	Methocarbamol	PHAR	a muscle relaxant
Norepinephrine PHAR used to treat low blood pressure and heart failure Protriptyline PHAR nerve pain medication and antidepressant Pyridoxine PHAR also known as vitamin B ₆ commonly in food and used as dietary supplement	Metoprolol	PHAR	a beta-blocker used to treat angina (chest pain) and hypertension (high blood pressure)
Protriptyline PHAR nerve pain medication and antidepressant Pyridoxine PHAR also known as vitamin B ₆ commonly in food and used as dietary supplement	Minoxidil	PHAR	help hair growth in the treatment of male pattern baldness
Pyridoxine PHAR also known as vitamin B ₆ commonly in food and used as dietary supplement	Norepinephrine	PHAR	used to treat low blood pressure and heart failure
and the same of th	Protriptyline	PHAR	nerve pain medication and antidepressant
Sitagliptin PHAR controls high blood sugar; diabetes medication	Pyridoxine	PHAR	also known as vitamin $B_{\mbox{\scriptsize 6}}$ commonly in food and used as dietary supplement
	Sitagliptin	PHAR	controls high blood sugar; diabetes medication

Name	Туре	Use
Sulfamethazine	PHAR	sulfonamide antibacterial medication
Sulfamethoxazole	PHAR	combination of two antibiotics; used to treat a wide variety of bacterial infections
10,11-Dihydro-10-hydroxy Carbamazepine	PHAR TP	anticonvulsant
1-Methylxanthine	PHAR TP	the major metabolites of caffeine in the human
2-Ethyl-2-phenylmalonamide	PHAR TP	an active metabolite of the anticonvulsant drug primidone
Benzoylecgonine	PHAR TP	the compound tested for in most substantive cocaine urinalyses
Paraxanthine	PHAR TP	a psychoactive central nervous system (CNS) stimulan; the preferential path of caffeine metabolism in humans
2,4-Dichlorophenoxyacetic Acid (2,4-D)	PEST	systemic herbicide which selectively kills most broadleaf weeds
Atrazine	PEST	broadleaf herbicide; one of the most widely used herbicides in US
Carbendazim	PEST	aka MBC; widely used, broad-spectrum fungicide used as a casting worm control agent on golf greens & tennis courts
Dimethachlor	PEST	used to control certain broadleaf and annual grassy weeds in agriculture
Diuron	PEST	algicide/herbicide inhibits photosynthesis; control a wide variety of annual and perennial broadleaf and grassy weeds
Fluridone	PEST	organic compound that is used as aquatic herbicide often used to control invasive plants
Imazapyr	PEST	non-selective herbicide; controls broad range of weeds including terrestrial grasses, riparian & emergent aquatic species
Imidacloprid	PEST	insecticide used to control aphids, thrips, whiteflies, scale, termites, turf and soil insects and some beetles.
Metalaxyl	PEST	fungicide; controls Pythium in vegetable crops, and Phytophthora in peas
Metolachlor	PEST	herbicide; highly effective on grasses
Prometon	PEST	herbicide for broad-leaf weed, brush and grass control mainly in non-cropping situations
Simazine	PEST	controls broad-leaved weeds/annual grasses in berry fruit, vegetable & ornamental crops, turfgrass, orchards & vineyards
Trinexapac-ethyl	PEST	manage growth of warm and cool-season turfgrass
Atrazine-2-hydroxy	PEST TP	transformation product of Atrazine
Atrazine-desethyl	PEST TP	transformation product of Atrazine
Atrazine-desisopropyl	PEST TP	transformation product of Atrazine
Metolachlor Ethane Sulfonic Acid (Metolachlor ESA)	PEST TP	the ESA degradates of Metolachlor; can be persistent in soil

Name	Type	Use
Metolachlor Oxanilic Acid (Metolachlor OA)	PEST TP	the OA degradates of Metolachlor; can be persistent in soil
2-Hydroxybenzothiazole	PCHC	released into wastewaters during the industrial production of a rubber vulcanization accelerator
5-Methyl-1H-benzotriazole	PCHC	corrosion inhibitor in antifreeze, engine oils, brake fluids, protective coatings
1H-Benzotriazole	PCHC	an effective corrosion inhibitor for copper alloys.
Benzophenone	PCHC	used in personal care products such as lip balm and nail polish to protect the products from UV light
Benzophenone-3 (Oxybenzone)	PCHC	benzophenone derivative used as a sunscreen agent; absorbs UVB and UVA II rays
Benzothiazole	PCHC	in many natural plant products; properties include anticancer, antimicrobial, antidiabetic, anticonvulsant, anti-inflammatory
Icaridin	PCHC	aka picaridin, almost colorless & odorless insect repellent with broad efficacy against insects and ticks
Melamine	PCHC	used in production of laminates, glues, plastic dinnerware, adhesives, molding compounds, coatings and flame retardants
N,N-Diethyl-3- methylbenzamide (DEET)	PCHC	most common active ingredient in insect repellents
Sucralose	PCHC	artificial sweetener and sugar substitute; the majority of ingested sucralose is not broken down by the body
Triclosan	PCHC	antibacterial antifungal agent in some toothpaste, soaps, detergents, toys, and surgical cleaning treatments
Galaxolidone	PCHC TP	a synthetic musk component used in fragrances (perfumes, colognes, soaps, detergents, etc)

KEY:

Name: Name of the contaminant

Type: Type of the contaminant:

PHARM: pharmaceutical

PHARM-TP: transformation product of a given pharmaceutical

PEST: pesticide

PEST-TP: transformation product of a given pesticide

PCHC: personal care/household chemical

PHCH-TP: transformation product of a given personal care/household chemical

Use: Contaminant typical use

Table 3: Summary statistics for the occurrence of chemicals of emerging concern (CECs) in NY lakes.

KEY Notes:

Name: Name of the contaminant

Type: Pharmaceutical (-transformation product), Pesticide (-transformation product), Personal Care/ Household Chemical (-transformation product)

LOQ: the lowest concentration of a CEC in a sample that can be confidently quantified with acceptable precision and accuracy

Min: minimum concentration observed in NY lakes during this study (2018 – 2019)

Max: maximum concentration observed in NY lakes during this study (2018 – 2019)

Mean: average concentration observed in NY lakes during this study (2018 – 2019). The average was calculated by summing all the observed concentrations for a particular CEC and then dividing by the number of observations for that CEC.

Median: median concentration observed in NY lakes during this study (2018 – 2019). The median concentration is the "middle" concentration where half of the observations have a lower concentration and the other half of the observations have a higher concentration.

For example: A lake has the following concentrations: 1, 2, 7, 12, 21, 57, 193.

The number of observations is 7, the average concentration is 42,

the median concentration is 12 (3 values < 12, and 3 values > 12)

No. Obs.: The total number of times a CEC was detected during 2018 – 2019. The higher the number, the more common the CEC is in NY lakes.
